CRITERIA

#	Criterion	Description	Bloom	Validated?
1	Prompt structure	I built a complete 5-element prompt (Role · Context · Task · Format · Constraints) for the onboarding plan	4	☐
2	Personalization	My onboarding plan prompt included at least 2 company-specific contextual elements (sector, culture, management style, etc.)	4	☐
3	Output quality	The 90-day plan generated by ChatGPT was structured in 3 phases with concrete objectives, actions, and deliverables	4	☐
4	Tone adaptation	I successfully used the tone adaptation technique — I pasted a company communication example and ChatGPT adapted its tone	4	☐
5	3-check rule	Before using any AI output during this module, I applied the 3-check rule: Accuracy · Relevance · Tone.	4	☐
6	Data security	I did not paste any personally identifiable information (real names, IDs, sensitive data) into ChatGPT during this module	4	☐
7	Time savings	I estimate that ChatGPT saved me at least 30 minutes compared to completing the Module 02 tasks manually	4	☐
8	Prompt library	I added at least one Module 02 prompt to my personal library in the team's shared workspace	4	☐

REFLECTION

Which use case saved you the most time?

Which criterion was hardest to achieve and why?

Which prompt will you use starting Monday?
